PROFILE SUMMARY

ECE undergraduate and aspiring AI Engineer building applications with Python, Large Language Models, and AI agents. Worked on AI projects involving API integration, automation, and data workflows. Interested in using machine learning to solve real-world problems and building AI systems that are practical, scalable, and reliable.

EDUCATION

Koneru Lakshmaiah University (KL University)

June 2024 - August 2028

Bachelor of Technology in Electronics and Communication Engineering (ECE) — CGPA: 8.36 Vijayawada, Andhra Pradesh

Narayana Junior College

June 2022 - April 2024

Intermediate (MPC) — Percentage: 86.7%

Hyderabad, Telangana

TECHNICAL SKILLS

Programming Languages: Python, C, SQL

AI / Machine Learning: Machine Learning, Large Language Models (LLMs), AI Agents, RAG (Retrieval-Augmented Generation), LangChain

Libraries & APIs: Pandas, NumPy, REST APIs, API Integration

Web Development: FastAPI, React.js, Next.js

Tools & Platforms: Git, GitHub, Streamlit, Vercel

PROJECTS

ATS Resume Analyzer | Python, FastAPI, React.js, LLM Integration

July 2026

<https://ats-resume-analyzer-mu-one.vercel.app/>

- Built an AI-powered resume analysis tool that evaluates resumes against job descriptions and returns ATS compatibility scores.
- Designed backend scoring logic using Python and LLM-based text analysis to identify keyword and formatting gaps.
- Developed a responsive web interface for users to upload resumes and instantly view actionable improvement suggestions.

DOWNTIME - Intentional Screen Time App | React, Next.js, Supabase, Tailwind CSS

July 2026

<https://downtime-sable.vercel.app/>

- Built a Next.js + Supabase application that tracks phone interruptions, unlocks, and time between usage sessions.
- Provided detailed insights on interruption patterns to help users build mindful digital habits and reduce mindless scrolling.
- Integrated analytics to measure user behavior and engagement with modern UI/UX using Tailwind CSS.
- Achieved 700+ website interactions within the first 2 days of launch.

AI Internship Recommender | Python, Scikit-learn, Streamlit

May 2026

<https://careerpilot.streamlit.app>

- Built a full-stack ML web application that predicts suitable internship roles from a student's academic profile and technical skills.
- Implemented a skill-gap engine that auto-generates personalized 12-week career roadmaps.
- Trained and deployed a Scikit-learn classification model to power real-time role predictions.
